1 Arxiv-Spider

This is a spider (or scrawl) to download papers in computer science area in arxiv.org. The paper will be used in our prp project.

2 How to Use It

First,ensure you have installed python3 in your computer,then download the source code from github:

```
$ git clone https://github.com/cjqw/arxiv-spider ~/arxiv-spider
```

Change the first line to specify your python3 path. Run the program directly and it will download 10 papers by default.

```
$ chmod a+x spider.py  
$ ./spider.py
```

To doanload more papers, change the value of max_pdf to whatever you want.
